If you are interested in representing or distributing Cementec's best-in-class concrete hardener Hard-Cem, please contact us now.

Hard-Cem is manufactured in Canada. Due to increasing demand for Cementec's value added products we are seeking American distributors in select regions of the United States. Our goal is to align with construction products distributors who are best suited to take innovative approaches to next generation products and leverage existing sales channels, brands and reputation and translate this into sales and above average margins for the distributor.

Cementec Industries is an award winning product developer and manufacturer of proprietary concrete products for the construction industry. Cementec manufactures Hard-Cem, the only integral (not surface applied) concrete hardener on the market for increased abrasive and erosive wear resistance of ready mix concrete, precast concrete and shotcrete. Hard-Cem has been utilized in over 50,000,000 ft² of concrete flatwork across North America in commercial, industrial, hydro and infrastructure applications.
